Features & Specifications

MA 100 SERIES

Features

This device contains one horn and one control box. Its advanced design with lightweight, compact and selectable tone provides continuous and economical operation. All the unique tones are produced by a digital micro-controller unit (MCU). The built-in automatic control circuit enables more than 10 kinds of selectable tone to be produced with a tone setting dip-switch.

※ This feature is particularly useful in some specific situations where there are distinctive tones required, such as areas with high decibel of noise.

Applications(suggested)

Specifications

Power consumption	< 45W
Operating voltage/current	100~240VAC/(60/50HZ)/max 0.6A
Volume	in 1 meter of distance
	Over 95dB
Resistance	8Ω
Anti surge	over 4000V
Water-proof	IP65
Operating Temp.	-10°C ~ +60°C (humidity under 85%)
Anti-vibration	Tested on the basis of 45m/Sec ²
Dimension	145x127x101mm (Control box housing)
	220x220x271mm(Siren housing)
Weight	3,300 ± 100g
